

## Model Development Phase Template

|               |                                       |
|---------------|---------------------------------------|
| Date          | 29 September 2024                     |
| Team ID       | 739753                                |
| Project Title | Strain analysis based on eye blinking |
| Maximum Marks | 5 Marks                               |

### Model Selection Report

In the model selection report for future deep learning and computer vision projects, various architectures, such as CNNs or RNNs, will be evaluated. Factors such as performance, complexity, and computational requirements will be considered to determine the most suitable model for the task at hand.
